

## SUMMER LAUNCH

### 8th Grade - Math

Your **math** summer assignment opens on July 1 (8am) and closes on Aug 25 (11:59pm). We use DeltaMath. The information covered in your summer work reviews *previously* learned key math concepts and skills. The objective of summer math work is for each student to enter his math class in 2024-2025 with prior math content and skills *mastered and retained*. To enroll, please log on using the course specific link below. Select the options “**Sign Up Using Google**” (using your hermits credentials). If you have any issues signing up, please contact our STEAM Division Head, Mr. Sean Grealis at [mr.grealis@hermits.com](mailto:mr.grealis@hermits.com) or at extension 184.

#### Course Codes and Links

Algebra 1    FA88-L2QK

<https://www.deltamath.com/students?code=FA88-L2QK>

Pre- Algebra    HG33-LB5E

<https://www.deltamath.com/students?code=HG33-LB5E>

As a refresher, on Thursday 6/20, you received an email from Mrs. McHugh announced that you are able to view your 2024-2025 courses in MyPrep under the “course request” tab. Note: Though labeled “course request” by our SIS, this is the math course in which you have been enrolled.

Your summer math assignment will be worth two homework grades, and every teacher will be quizzing all students on the summer work material during the first week of school. Teachers will not accept late work for any homework credit.
