

## **For Classes of 2022, 2023, and 2024**

Hermits,

Your summer assignment is now ready! Like last year, you will be using the Aleks online program. The assignment opens today June 15th and closes on August 15th. The information covered in Aleks reviews last year's key math concepts with a small introduction into what you will see next year in your math class. Because Aleks is "adaptive software," and thereby works to individual topic mastery, the more seriously you approach each topic the faster you will finish the summer assignment. This assignment will be worth two homework grades, AND every teacher will be testing you on this summer review within the first week of school. Please take this work seriously. Late work will not be accepted as part of this homework grade. Your login credentials were reviewed during the third semester - remember do not create a new account. If you have any questions, please contact Mrs. McHugh ([mrs.mchugh@hermits.com](mailto:mrs.mchugh@hermits.com)) or Mr. Wooster ([mr.wooster@hermits.com](mailto:mr.wooster@hermits.com)).

Enjoy the summer!
